To whom it may concern,

Several colors we use for SizzlePak® and SizzleFine® are tested in a representative mix of shades.

All tested colors were approved for direct contact with dry and not fatty food. In order to avoid any misunderstandings, we have decided not to recommend any colored paper for contact with moist food.

Furthermore, the papers were tested for release of heavy metals and fulfilled the requirements according to DIN EN 71, part 3 "Safety for toys".

The following grades of SizzlePak® and SizzleFine® are tested:

- Natural 011 (Recommendation XXXVI)
- Cool Grey 023 (Isega / Recommendation XXX VI)
- Cream 535 (Recommendation BFR XXX VI)
- Ivory 052 (Recommendation BFR XXX VI)
- White 200 (DIN EN 71 safety for toys)
- Burgundy 472 (Isega / Recommendation XXX VI)
- Deep Red 024 (Isega / Recommendation XXX VI)
- French Vanilla 014 (Recommendation BFR XXX VI)
- Orange 048 (Isega / Recommendation XXX VI)
- Sky Blue 072 (Isega / recommendation XXX VI)
- Turquoise 077 (Isega / recommendation XXX VI)
- Navy Blue 958 (Isega / Recommendation XXX VI)
- Chocolate 008 (Isega / recommendation XXX VI)

This means that Forest Green / Black / Cognac / Cobalt / Bright Red / Yellow / Fuchsia / Green / Lime Green / Pink / Purple / Brown / Lilac / Fuchsia / Silver and Gold are not suitable for contact with dry and fatty food.
